

# United States Department of the Interior

OFFICE OF THE SECRETARY  
Washington, D.C. 20240

April 3, 2001

Ms. Margarita Benitez  
Acting Director  
Office of the White House Initiative  
On Tribal Colleges and Universities  
U.S. Department of Education  
330 C Street, S. W., MES 4050  
Washington, DC 20202-7594

Dear Ms. Benitez:

We are pleased to forward the Department of the Interior Fiscal Year 2001-2003 Plan to Implement Executive Order 13021. The total amount planned for each of the fiscal years is as follows:

FY 2001 - \$39,337,383  
FY 2002 - \$39,261,680  
FY 2003 - \$41,595,945

If there are questions or additional information is needed, please contact Sylvia Jones, Office of Educational Partnerships, on 202/208-3254.

Sincerely,

A handwritten signature in black ink that reads "Wendell K. Sutton".

Wendell K. Sutton  
Deputy Assistant Secretary  
for Human Resources

## U.S. DEPARTMENT OF THE INTERIOR

### FY 2001-2003 PORTIOIN OF THE 5-YEAR PLAN TO SUPPORT EXECUTIVE ORDER 13021 TRIBAL COLLEGES AND UNIVERSITIES

#### A. EXECUTIVE SUMMARY:

##### 1. 5-Year Plan Summary:

The Department of the Interior (DOI) is committed to effectively respond to the mandates of Executive Order 13021: Tribal Colleges and Universities. Interior's aim is to develop and maintain a workforce which is reflective of America's population. A major goal toward supporting the Executive Order is built on DOI's educational partnerships and programs which focus on outreach, recruitment and placement of qualified candidates. Historically at Interior, there have been significant under-representations of various minority groups in occupations critical to DOI bureau and office missions. American Indians are among the minority groups that have been targeted for recruitment for key DOI positions. Therefore, the following DOI priority goals and measurable objectives in support of Executive Order 13021 are presented.

- becoming an employer-of-choice for American Indians;
- recruiting from all sources and increasing the numbers of American Indian hires into the full-time permanent workforce;
- developing strong working relationships with the colleges and universities where minority students are located;
- increasing participation at national conferences in support of Tribal Colleges and Universities and affiliate organizations such as the American Indian Higher Education Consortium (AIHEC) that promote success;
- increasing the level of attendance at career fairs and college campuses to promote student employment programs;
- increasing the numbers of American Indian student interns converted to the Student Career Experience Program (SCEP);
- increasing the numbers of American Indian students participating in the DOI Diversity Intern Program and other student employment programs;
- provide DOI's inventory of educational programs to the K-16 American Indian community;
- promote educational partnerships that maximizes the participation and employment of American Indian students;
- market and distribute education materials to areas with high American Indian populations.

In FY 1999, the Department of the Interior (DOI) undertook a national leadership role in establishing a long-range plan to support tribal colleges. Over the next three years, the bureaus and offices within the Department will carry out activities with tribal colleges in a collaborative approach to meet the requirements of the five year plan, to develop public-private partnerships, and to institutionalize policy.

The Office of Educational Partnerships in the Office of the Secretary will have the lead responsibility for helping bureaus and offices establish or enhance policies and programs in support of tribal colleges. This will be enhanced through the DOI/AIHEC MOU which was signed in April 2000. The Office of Indian Education Programs in the Bureau of Indian Affairs will play a lead role in providing technical assistance to bureaus and offices for linking tribal colleges with BIA schools and programs.

Over the next several years, the bureaus and offices will continue ongoing activities with tribal colleges and focus on the development of human resources and student support at the tribal colleges. An emphasis on expanding institutional support will also be a high priority. At the same time, the bureaus and offices will increase efforts to collaborate on priorities that are shared with other executive departments and agencies in order to expand the opportunities for developing partnerships with tribal colleges.

The Department is particularly concerned about under-representation in its workforce. One of the ongoing programs that addresses this issue is the Diversity Intern Program which recruits minority students for Federal internships. This program is expected to increase dramatically in the next few years and provide more opportunities for the participation of tribal college students. In FY 2001-2003, the Department's participation in on-campus activities such as job fairs and career days is also expected to provide opportunities for targeted recruitment of tribal college students. For example, the Department was a major sponsor of AIHEC's annual education conference with support from DOI bureaus.

The Department will address opportunities for tribal colleges to contract for research and participate in related projects. Special emphasis will be placed on helping bureaus and offices establish ties with those tribal colleges where the academic interests and curricula reflect a similar emphasis and mission. Strategies will be developed in the next few years to help insure tribal colleges gain greater participation in scientific studies and are prepared for research opportunities offered by the Department.

## 2. Principal Objectives:

Objective 1:

Increase the use of the Diversity Intern Program and other student employment programs to recruit and place American Indian students with natural resources related majors into temporary and permanent employment positions.

Objective 2:

Attend conferences/workshops to attract students for employment into the various DOI student employment programs.

The Bureau of Land Management will fund a trianing workshop and technical assistance on natural resources for Tribal College and University faculty to be conducted by Colorado State University.

#### Facilities and Equipment

Planning will continue by USGS for the improvement of the GIS Lab at Haskell to provide increased accessibility by students and faculty. Funding will be used for computer upgrades to the operating system, equipment maintenance and software license renewals. A total of \$60,000 is planned for the 3-year period.

#### Student Tuition, Scholarships and Other Aid

The Bureau of Reclamation (BOR) will continue its partnership agreement with New Mexico Highlands University (NMHU) which through an articulation agreement provides Reclamation-funded scholarships for engineering and natural resource majors at Southwestern Indian Polytechnic Institute (SIPI) to attend NMHU. The BOR is also in the process of finalizing a partnership agreement with California State University at San Bernadino which will allow SIPI students to pursue masters degrees in Water Resource Management at Cal-State San Bernadino.

The BOR is also in the process of establishing a scholarship fund in fiscal year 2001 for Native American students pursuing their education beyond a 2-year college degree.

#### Technology and Facilities and Equipment

The BOR's 5-year plan focuses on the following two TCU-White House Priority Areas - Area 2: Technology, Science, and Math and Area 3: Facilities. In addition to providing excess computer equipment to TCUs as it becomes available, Reclamation provides financial support for a water technology component of the Environmental Science and Technology Training Program at SIPI.

#### Direct Institutional Subsidy

Under an MOU with the SIPI Board of Regents, the BOR plans to annually contribute \$200,000 in support the College Bound Math and Science Enrichment Program at SIPI designed to increase the number of Native Americans and Alaska Natives who graduate from high school with emphasis in mathematics and science and go on to complete engineering and/or science and technology undergraduate and graduate programs.
